Work experience

Software Developer at GoClick 01/2021– 05/2021

Developed a mobile application for a supermarket, enabling users to conveniently shop for groceries online during the Covid-19 pandemic.

TechStack:

- React Native
- Spring Boot
- MySQL
- AWS
- Stripe API

Achievements:

- Deployed the application on AWS EC2, ensuring optimal performance and scalability to meet user demand.
- Implemented a secure and efficient RESTful API using Spring Boot, incorporating JWT for authentication.
- Integrated Stripe API for seamless and secure online payments, offering clients the option to pay during delivery with cash or card.
- Incorporated features allowing users to select home delivery or in-store pickup at their preferred supermarket branch, enhancing convenience and flexibility for customers.

This project showcased my expertise in full-stack development, software integration, and creating solutions that address specific needs during critical times.

Freelance 08/2021– 09/2021

Designed and developed a dynamic website for a car dealership, showcasing expertise in full-stack development and technology integration.

TechStack:

- CodeIgniter (PHP)
- MySQL
- HTML
- CSS (Bootstrap)

Achievements:

- Developed a user-friendly website allowing efficient car listing management for the admin, facilitating easy addition, updating, and removal of vehicles.
- Implemented a seamless interface for regular clients to access comprehensive car listings, showcasing detailed information for each vehicle.
- Demonstrated proficiency in utilizing a diverse technology stack to deliver a functional and intuitive solution.
- This experience highlighted my ability to integrate various technologies and create solutions that meet specific business needs while ensuring an optimal user experience.

Education

2022– 2025	Bachelor degree in Software Engineering Via University College, Denmark
2018– 2021	Software Developer Certificate Escola Profissional Cristóvão Colombo, Portugal
