### **Tech Stack**

- Java / Spring Boot
- JavaScript
- C# / .NET
- HTML / CSS
- SQL (MySQL, PostgreSQL)
- React
- React Native
- Next.js
- Scrum / UML / UP
- Git
- Linux (WSL)
- Docker
- Kubernetes
- AWS

# Guilherme Miranda

Software Engineer

# **Experience**

# (01/2021-05/2011)

### GOCLICK

Full Stack Developer

- Developed an API and mobile application for a supermarket during COVID-19 pandemic, enabling users to shop for groceries online.
- Deployed the API in AWS EC2, used JWT for authentication and Stripe API for secure online payments.
- Users could shop online and allowed users to select home delivery or in-store pickup at their preferred supermarket branch.
- Tech Stack: React Native, Spring Boot, MySQL, AWS

# (08/2021-09/2011)

#### **FREELANCE**

Full Stack Developer

- Designed and developed a dynamic website for a car dealership with admin dashboard, showcasing expertise in full-stack development and technology integration.
- Tech Stack: Codelgniter(PHP), MySQL, HTML, CSS

## **Education**

(2022-2025)

### **VIA UNIVERSITY COLLEGE**

Bachelor of Software Engineering Horsens, Denmark

(2018-2021)

### **EPCC**

3-Year Diploma in Software Development Funchal, Portugal

### Soft Skills

- Communication
- Collaboration
- Adaptability
- Time management
- Leadership
- · Conflict resolution

### Languages

- Portuguese (Native)
- English (C2)
- Spanish (A1)
- Danish (A1)

# **School Projects**

#### **SOFTWARE ENGINEERING PROJECTS**

#### Semester 1

 Part of a team that developed a Hotel Website using HTML, CSS, JavaScript and Back-End using Java.

#### Semester 2

 Client-Server system with JavaFX and Java with design patterns, Scrum methodology and SOLID principles.

#### Semester 3

 Developed a Tier-3 system with server to server communication using Java (Spring Boot) and C# (.NET) and the Front-End with C#(Blazor), with Kanban methodology.

### Semester 4 (Currently)

 IoT project with multiple teams - IoT, Cloud and Front-End

### **SOFTWARE DEVELOPMENT PROJECTS**

#### Front-End

 Created multiple websites in multiple languages to learn and master it. (PHP, HTML, CSS, React, JavaScript)

### Back-End

 Developed various systems during this diploma, including API's and Back-ends to websites.
 (JavaScript, Java, Spring Boot, PHP, Codelgniter)

### DataBase

 Designed and developed many databases using code and diagrams. (MySQL, PostgreSQL, SQLite, MongoDB)

### **FullStack**

 With all the knowledge above, I developed many FullStack projects to showcase my expertise in all of the fields above

### **INDIVIDUAL PROJECTS**

Available at my GitHub.
