Work experience

Software Developer Intern at GoClick   01/2021 – 04/2021

During the internship I participated in two projects, a Supermarket Delivery App and a Delivery App:

- Designed and developed the Back-End part of the projects
- Built API's using Spring Boot and Databases using MySQL
- Worked together with another Front-End developer and constantly in contact with the client.
- Helped the Front-End developing the applications after finishing the Back-End

These projects were made during the Corona Virus and it was a solution for a more secure environment having less contact between people.

(Spring Boot, MySQL, React Native, Node.Js, Stripe, AWS)

Education

2022 – 2025	**Bachelors in Software Engineering** Via University
2018 – 2021	**High School Diploma in Software Development** Escola Cristóvão Colombo, Portugal

Tech skills and competencies

React | React Native | Node.JS | Next.JS | PHP | JavaScript | Java | HTML | CSS | Agile | REST
CodeIgniter | MySQL | API's | Spring Boot | Android Native | AWS | GitHub | Scrum | Web Services
